NA49 results on single particle and correlation measurements in central Pb+Pb collisions

Fuqiang Wang
Lawrence Berkeley National Lab
(for the NA49 collaboration)

OUTLINE:

1. **Chemical freeze-out conditions**
   - Net-baryon rapidity distribution
   - Charged kaon abundances
2. **Space-time freeze-out conditions**
   - Two-pion HBT interferometry
   - Two-proton correlation functions
3. **Summary**
